EXPERIENCE

Tata Consultancy Services (TCS)

Oct 2024 – Present

Full Stack AI Engineer

- **Agentic Compliance Screening Platform** – Built a KYC compliance automation system to verify client onboarding data and perform adverse media and sanctions screening.
- Designed an iterative, custom tool-calling agent that loops over tools like Google Search, Playwright crawlers (via MCP), sanctions check, and historical retrieval (RAG).
- Engineered hybrid deterministic + LLM pipelines to ground decisions, reduce false positives, and cut manual investigation.
- **GenAI Payment Repair System** – Built an AI-assisted system to analyze and repair broken payment messages from free-text descriptions, replacing manual investigation workflows.
- Designed a hybrid pipeline combining LLM-based extraction with deterministic rule-based analysis for reliable message repairs.
- Implemented an agentic CrewAI workflow with recursive repair and validation agents to handle cascading fixes.
- Orchestrated multi-step repair flows using FastAPI, ensuring fault tolerance and reduced operator intervention.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java

Backend: Node.js, Express.js, FastAPI, Flask

Frontend: React.js, Next.js, React Native, Redux Toolkit, Zustand, TailwindCSS

AI / LLM: LangChain, CrewAI, MCP, Prompt Engineering, RAG, Embeddings, Tool Calling

Database: MongoDB, PostgreSQL

Tools: Docker, Git, Postman, Playwright

PERSONAL PROJECTS

Patronix - E-commerce Platform | *React.js, Node.js, Express.js, MongoDB*

July 2023

- Developed a full-stack E-commerce web application with user authentication, product management, and order tracking.
- Optimized frontend performance and global state management using Redux Toolkit.
- Designed RESTful APIs with token-based authentication and modular architecture for maintainability.

ExpenseGauge - Expense Tracker App | *React Native, Node.js, MongoDB*

March 2025

- Built an offline-first expense tracking app using Expo (React Native) with reliable local persistence and automatic synchronization on network reconnection.
- Implemented secure authentication using short-lived access tokens and rotating refresh tokens, ensuring session continuity without compromising security.
- Designed RESTful backend services with Node.js and Express, supporting role-based access and expense analytics with visual trend insights.

EDUCATION

Vidyalankar Institute of Technology

Bachelors in Computer Engineering

GPA: 9.2 / 10

Mumbai, IN

May 2024
