EXPERIENCE

Tata Consultancy Services (TCS)

Systems Engineer

Oct 2024 – Present

- **AI-driven Compliance Screening Platform** – Engineered a scalable compliance screening platform using FastAPI, Azure OpenAI, and Playwright to automate customer due diligence and adverse media screening.
- Implemented sanctions and embargo verification through fuzzy matching algorithms, reducing false positives and manual review workload.
- Designed asynchronous data ingestion pipelines with caching and concurrency controls, optimizing throughput for large Excel datasets.
- **Credit Memo Generation System** – Built an AI-assisted financial analysis engine that generates credit memos from company financial reports.
- Processed and chunked unstructured financial data, indexed it using vector embeddings, and integrated with Azure OpenAI for contextual retrieval and reasoning.
- Generated structured financial spreads and credit memos based on retrieved insights, automating the analyst workflow and improving turnaround time by over 60%.
- Leveraged FastAPI for API orchestration, ensuring secure and modular integration between LLM components and business logic.

PROJECTS

Patronix – E-commerce Platform | *React.js, Node.js, Express.js, MongoDB*

July 2023

- Developed a full-stack E-commerce web application with user authentication, product management, and order tracking.
- Optimized frontend performance and global state management using Redux Toolkit.
- Designed RESTful APIs with token-based authentication and modular architecture for maintainability.

ExpenseGauge – Expense Tracker App | *React Native, Node.js, MongoDB*

March 2024

- Developed a mobile expense tracking app with offline-first support using Zustand for state management.
- Implemented secure authentication with rotating jwt tokens and background data synchronization.
- Visualized spending patterns with dynamic charts.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript

Frontend: React.js, Next.js, React Native, Redux Toolkit, Zustand, TailwindCSS / NativeWind

Backend: Node.js, Express.js, FastAPI, Flask

Database: MongoDB, PostgreSQL

Cloud & Tools: Docker (Learning), Git, Postman, Playwright
